WILL BE TAKEN USING SMARTPHONES ⁽¹⁾**

PHOTO-ME LIFE KIOSK

1. **Modern** design and easily connected to multiple printers
2. User-friendly interface for quick and **easy ordering**
3. Software can be **customised** to suit the needs of the owner and customer

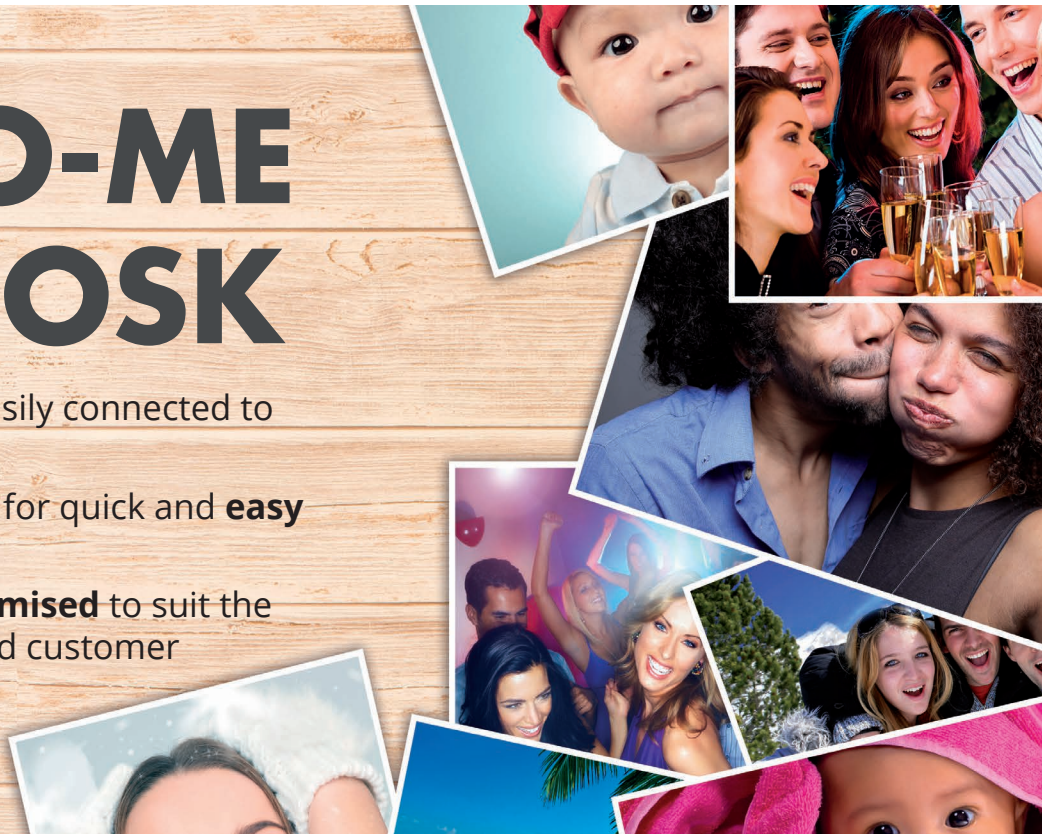

Photo-Me offers photographers the latest technology in a compact photo kiosk. The LIFE KIOSK by Photo-Me is simple, user friendly and innovative.

■ **User-Friendly Interface**

Many of your customers use smartphones and tablets everyday. In order to make them feel comfortable using this new kiosk, the LIFE software took inspiration from smartphones and tactile PC interfaces. Customers will be comforted by the familiarity and find the kiosk easy to use.

■ **Connectivity**

The LIFE kiosk is **compatible with most printers and minilabs** in the market.

■ **Innovation**

Today, more and more photos are taken using smartphones and tablets. Customers will easily be able to transfer photos from their smartphones and tablets, as well as USB sticks, memory cards, CD/DVDs and directly from their Facebook or Instagram photo gallery.

Photo-Me

PRODUCT DETAILS

■ All-in-one photo kiosk

The LIFE Kiosk is a compact photo kiosk consisting of the screen and media readers (computer is integrated within the screen). The 23" multi-touch screen has a **bright and glossy display**, a **finger print resistant coating**, and can be tilted to the users desired angle.

Thanks to a **full HD screen**, your customers will enjoy great image quality, whatever the perspective.

■ Wide range of photographic products

The software has **no limits in terms of product offerings**; prints can be available in all sizes, and users can create anything from ID & VISA photos, greeting cards, collages, calendars to photo gifts.

■ Transfer photos from smartphones and tablets

Any smartphones or tablets can be connected to the kiosk using either a **cable, Bluetooth™ or social media**. All photos are displayed within seconds for customers to choose from.

■ Customisable

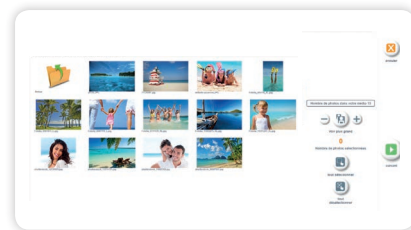

Fast track orders, new product categories or price configurations, the kiosk software can be **customised** to meet the needs of the owner and customers.

■ The Software

The software is extremely flexible for the customer as well as for the retailer:

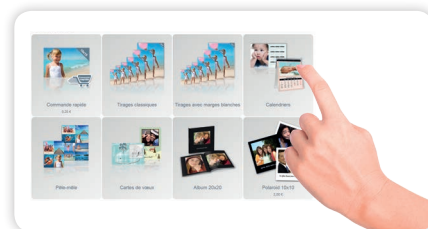

- **For the customer:** a powerful display tool allows the customer to choose the size of previewed photos, thus facilitating navigation.

- **For the retailer:** with the software configuration menu, the retailer can choose which products are available and define several parameters in order to adapt the kiosk to their customers.

■ User-friendly interface

Tap, drag, pinch...With its non marking coating, don't worry about leaving finger prints on the touch screen. The LIFE software took inspiration from **smartphones**, so the user feels comfortable with the familiarity. It is possible to place an order from multiple media, devices or social media.
